Profile

I started exploring the computer science field to satisfy my curiosity and desire to deal with issues on my own. As a matter of fact, I derive pleasure from having the ability to fix and create things independently whenever I am facing a challenge while working on a computer. This feeling fuels my ongoing journey in learning.

Experience

UAB SAMUS, Vilnius

Jul 2014 - Mar 2024

Project Manager

- Coordinated with internal teams and external vendors to ensure timely and accurate delivery of mail.
- Monitored mail-related systems and technologies.
- Communicated project status, risks, and issues to senior management and stakeholders regularly.
- Ensure compliance with regulatory requirements and company policies related to mail handling.

Projects

PayAPI

Source Code: https://github.com/Seven-Apuok/Ziemos_kodas

Live Website: <https://ziemos-kodas.vercel.app>

This project is a „PayAPI“ application with 4 pages: *Home: Summary of the functions in the application. *Pricing: Three different plans which customers can order. *About: Information about the company. *Contact: Ability to contact the company. This application has only design with minimal frontend functionality. It created by group of the students.

Task List

Source Code: <https://github.com/Bernardasko/TaskList>

Live Website: <https://task-list-red-two.vercel.app>

A 'Task Manager' application featuring task management capabilities, developed with React.js and styled using Material-UI components. The application allows users to add, edit, and delete tasks, as well as update task progress. Users can filter tasks based on their status or priority. Additionally, the application utilizes JSON Server for backend data management.
